Replaced the 'Sound Profile' graph with the old 'Frequency Response' graph. The test results for the following models have been converted to the new testing methodology. Brought back the original 'Sound' score, via a rating usage named 'Neutral Sound', which replaces 'Neutral Listening'. 368 Headphones Updated We have retested popular models. Its telescopic arm can sustain over 5,000 bendings and stretchings. Its foldable design ensures a world of convenience for the user. This new score has no component besides sound elements and uses the Bass, Mid, and Treble boxes. Removed the confusing 'Neutral', 'Bass Heavy', 'Warm', and 'Bright' sound profile scores, and instead add 'Bass Amount' and 'Treble Amount'. Also, it's worth noting that you can customize it to your liking via this tool: . And it takes your music to an entirely new level, at once stirring and lively, with a rousing, rock-concert feel to it. Just insert a Micro SD card loaded with your favourite music into your T3 Plus headphone and you are good to go. Line-in and line-out playback The line-in playback support allows you to listen to music even when the battery has run out. With the all-new 3D stereo sound effect, the T3 Plus goes where no Turbine series headphone has gone before, giving you a feel of real-time, lively, throbbing music. T3 Plus headphones are not only gorgeous to look at, they have an unmatched sound quality too. Thanks again everyone for your feedback in this thread! The original changes in 1.3 were made because we received complaints from people wanting a sound that's different than neutral, but we shouldn't have done those changes at the expense of people that want an objective sound score based on research. Memory foam is rich in proteins, is extremely soft and well-ventilated, and adds a soothing cushion of comfort for the wearer. So if you are looking for great sound as well as a great build, this is the headphone for you. And the line-out playback helps you share your music with your friends by connecting to their headphones. See the next 1.4 changelog. The volume controls, for example, share the same buttons as track skipping. OS Compatibility Not OS specific Ease Of Use Poor Feedback Okay Call/Music Control Yes Volume Control Yes Microphone Control No Channel Mixing N/A Noise Cancelling Control N/A Talk Through N/A Additional Buttons No The Bluedio T3 Plus have okay controls. However, the text might be inconsistent with the new results. Ergonomic, foldable design T3 Plus is built to last. Accessories: Micro USB charging cable, 3.5mm audio cable, multilingual user manual, carrying pouch. Technical Support Number: 0161-5000023 Top reviews from other countries However, the button layout is confusing and inefficient. Music streaming via Micro SD card You don't really need a mobile phone or any other device to stream music. As a result, you may accidentally skip a track when trying to adjust the volume. Usage Ratings Changed all rating usages to use (33% bass + 33% mid + 33% treble) instead of (50% Neutral + 50% Peaks/Dips). Unintuitively, you have to hold the button to increase the volume, yet a slight tap will skip tracks. Here are the changes we made that should bring the best of both systems: Sound Brought back 'Bass', 'Mid', 'Treble' boxes, but renamed to 'Bass Accuracy', 'Mid Accuracy', 'Treble Accuracy' (in the past, some people were confused about the old names). The call/music, track-skipping, and volume buttons are clicky and responsive. And beyond the sound is the structure - T3 Plus's sleek zinc alloy body is among the sturdiest ones around. Comfortable wearing experience T3 Plus boasts of specialised ear cups padded with 'memory foam'. Page 2 See the previous 1.3 changelog. Benefits of T3 Plus Bluetooth Headphones: 3D stereo sound effect T3 Plus is the first headphone in the Turbine series to have a 3D sound effect.
